## THE PERFECT SIZE FOR YOUR PIECE OF NIESSING JEWELRY

Whether it's a ring, bracelet, or necklace, the right size is of great importance for the perfect appearance. Use the following tools to determine your desired size. Our concierge will be happy to assist you at any time.

### 01. RINGS – FIND THE PERFECT NIESSING RING SIZE

Print this page in A4 format or make sure that the scale is correct. If you do not select print adjustment in the settings, the page will be printed in its original size. Place your well-fitting ring on the circles for comparison. The circle line should be recognizable within the ring.

**RING SIZER TABLE**

 15,3 mm SIZE 48	 15,9 mm SIZE 50	 16,2 mm SIZE 51	 16,5 mm SIZE 52	 16,8 mm SIZE 53
 17,2 mm SIZE 54	 17,5 mm SIZE 55	 17,8 mm SIZE 56	 18,1 mm SIZE 57	 18,4 mm SIZE 58
 18,8 mm SIZE 59	 19,1 mm SIZE 60	 19,7 mm SIZE 62	 20,3 mm SIZE 64	 21,0 mm SIZE 66

## 02. NECKLACE – DETERMINE THE LENGTH FOR YOUR MATCHING NIESSING COIL

The Niessing coil for the neck is available in different lengths and thicknesses. Depending on your personal taste, style, and physique, you can select the appropriate length.

To determine the size at home, take a stiffer textile or nylon cord with a length of up to 100 cm and place it around the neck. If you want to wear the coil closer to the neck, form a circle and define by the length at what height of the neckline the pendant should be worn. Then measure the length of the cord with a yardstick and note the cm.

The average length for a coil worn close to the neck is 42 cm. Available sizes:

LENGTH	WEAR LOCATION
39 cm	1. Close to neck
40 cm	
41 cm	
42 cm	
43 cm	2. Upper neckline
44 cm	
45 cm	
46 cm	
50 cm	3. Middle/lower neckline
55 cm	
60 cm	
65 cm	4. Middle torso
70 cm	
75 cm	
80 cm	
85 cm	
90 cm	
95 cm	
100 cm	

The most popular coil thickness is 1.2 mm, more delicate and falling softly is the version with 1.0 mm, while the 1.5 mm coil shows more presence. The 1.7 mm coil is suitable for bigger pendants. Please note that finer pendants in particular cannot be adjusted for stronger coils.

## NECKLACE NIESSING NOW CHAIN

The Niessing Now necklace is available in different lengths. Depending on personal taste, style and physique, the appropriate length can be selected. To determine the size at home, take a textile cord with a length of up to 80 cm and determine your preferred length. The Now chain is available in the following lengths:

LENGTH NOW CHAIN	WEARING LOCATION
400 mm	Close to neck
450 mm	Neckline
500 mm	
600 mm	
800 mm	Middle torso

## 03. ARM JEWELRY – FIND YOUR PERFECT SIZE

Depending on the piece of jewelry, we use different methods to determine the size. Whether circumference or diameter is relevant is defined by the piece of jewelry and its shape. The measurement position depends on whether the piece of jewelry can be opened.

### CLOSED ARM JEWELRY LIKE COLETTE, COLETTE X

Closed arm jewelry is slipped over your hand, so please measure as follows: Touch your thumb to your pinky finger. This is the hand position you will take when you later slip the bangle over your hand. Now place the cut-out measuring tape (see last page) at the widest point and measure the circumference.

CIRCUMFERENCE IN MM ACC. TO MEASURING TAPE	DIAMETER OR NIESSING SIZE SPECIFICATION
173 mm	55 mm
181 mm	57,5 mm
189 mm	60 mm
196 mm	62,5 mm
204 mm	65 mm
212 mm	67,5 mm
220 mm	70 mm

### OPENABLE ARM JEWELRY LIKE COLETTE C, NUOVA BANGLE, MIRAGE BANGLE, NOW TATTOO BANGLE, NOW GALAXY AND TWIST BANGLE

These jewelry pieces fit closer to your wrist and are open or can be opened. To size, measure the width of your wrist. If you want to wear the jewelry tightly, state its width, if you want it to be a little looser, choose 3.0 mm more. The width can be easily determined with our Niessing measuring tape or ruler.

DIAMETER IN MM AT THE WIDEST POINT – NIESSING SIZE SPECIFICATIONS
50 mm
53 mm
56 mm
59 mm
62 mm
65 mm
68 mm

## ARM COIL FOR ARTIST

This piece of jewelry fits tighter on the wrist and can be opened. To determine the size, measure the circumference of your wrist. Place the measuring tape as tight or loose as is comfortable for you and how you want to wear the jewelry. The following sizes are available:

CIRCUMFERENCE IN MM – NIESSING SIZE INDICATION
175 mm
180 mm
185 mm
190 mm
195 mm
200 mm
205 mm
210 mm
215 mm
220 mm
225 mm
230 mm
235 mm
240 mm

## NIESSING MEASURING TAPE/RULER FOR SIZE MEASUREMENT

Before you use the measuring tape to find your size, make sure that these instructions have been printed on A4 paper and/or are scaled to 100 %. To check the accuracy of your printout make sure below line equals the length of 10 cm.

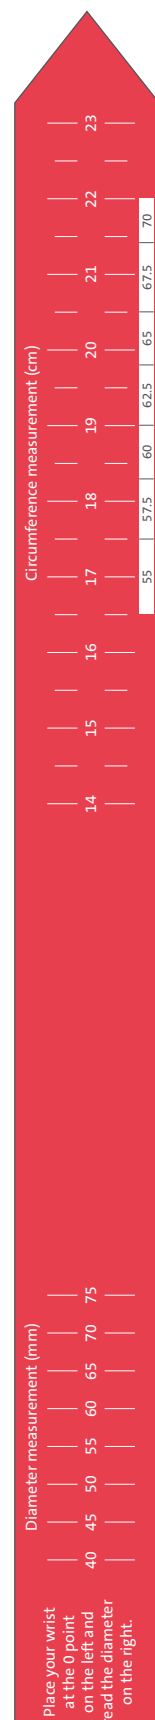

Scale: This line should correspond to 10 cm.

### TO MEASURE YOUR SIZE:

- For jewelry that is measured by wrist diameter, place your wrist at the 0 position and read the mm number on the other side of the wrist. (between 50 mm and 70 mm)
- For jewelry with circumference measurement: For arm jewelry that can be opened, measure your wrist circumference, for closed arm jewelry measure your hand circumference by touching your little finger with your thumb and measure the circumference at the widest point. To do this, cut out the ruler and make a cut for the slit. Wrap the tape measure around your wrist so that the numbers are visible and slide the end through the slit. Pull the tape until it is flush and read your wrist size.

Do you need help? Our Niessing Concierge will be happy to help you!
